West Rez
Lease.pdf (427 KB)

Hi Dave:

Attached is my analysis of the production from the unlisted Plots on this lease.

The data base the DOL is putting together is a mess, compiled from two sources-AEC and NIOSH. I have no idea if and when it will be public info. The AEC stuff is in the National Archives, but not computerized. NIOSH's names don't match the names in the AEC records, but contain radiation readings. Many problems.

Bill

Comparing Union Mines' maps to what I saw in the 50's & 60's, very little ore had been mined in the early 50's except on Plot 6 where a new mine had been developed.
